

Benefits to Your Organization

- **Reduce liability and identify potential risk**
 - Prompts to guide capture of all essential information
 - Identify root causes
 - Prioritize interventions
 - Track patterns and trends
- **Decrease insurance premiums**
- **Increase productivity**
 - Send reports to the team members you specify automatically
 - Track incidents by type
- **Strengthen risk management**
 - Improve the entire incident management lifecycle
 - Respond quickly to survey issues and concerns (designed for F-323)
 - Streamline investigations
 - Control reports during discovery

Strengthen your incident management with **ABILITY | RISKWATCH**. The **ABILITY | RISKWATCH** process focuses attention on each occurrence to ensure thorough investigation, proper response, and review for every event. You can document incidents such as accidents, pressure ulcers, medication errors, falls, and any others you choose. Use the comprehensive information from each occurrence to reduce risk, decrease liability, and improve resident care throughout the organization.

ABILITY | RISKWATCH cues the staff to track, record, investigate, respond and analyze the occurrence while documenting all the steps from beginning to end. The thoughtful investigative process can help show the diligence of the care provided when an adverse event occurs. The system monitors individual resident occurrences, providing the care team with better notification of potential issues or adverse outcomes.

With **ABILITY | RISKWATCH**, you can better mitigate risk, ensure compliance, demonstrate quality, and handle audits or litigation with accurate, comprehensive documentation. It adds up to stronger performance for your organization – and fewer costs and headaches.

Product Features
