

ABILITY CAREWATCH[®]

Evidence-based quality assurance and compliance

Get more accurate MDS assessments and higher reimbursements

- Catch MDS issues early and boost assessment accuracy
- Find untapped, justifiable revenues
- Summarize by location, state and more

Reduce survey citations

- Spot risks for survey tags
- Identify mismatches in logic
- Easily identify errors for resolution
- Transmit MDS assessments to CMS
- Manage 802

Drive continuous improvement

- Drive QAPI initiatives
- Monitor your 5-star quality rating status
- Compare results with targets
- Compare with state and national levels
- Prioritize training needs
- Decrease readmissions

Assist with the transition to PDPM

- Educational logic flags to help users prepare for PDPM
- ICD-10 Diagnosis Look-Up tool assists with appropriate CMS coding under PDPM
- Comorbidity Look-Up Tool for the NTA (Non-Therapy Ancillary) case-mix adjusted component of PDPM
- RUG-IV to PDPM reimbursement comparison tool

ABILITY CAREWATCH is an internet-based resource that helps improve resident assessment data accuracy and enhance care plans. Using the MDS, it highlights trends within the facility and for each individual resident.

ABILITY InfectionWATCH[™]

Comprehensive infection surveillance and antibiotic reporting

Streamline infection surveillance

- Save time and resources identifying infection-related sentinel events and detecting outbreaks
- Focus on prevention, intervention and performance improvement efforts
- Implement McGeer criteria easily
- Facilitate review of relevant data
- Expand surveillance capabilities

Enhance antibiotic stewardship

- Improve antibiotic treatment protocols
- Improve resident outcomes
- Track antimicrobial resistance patterns
- Identify nosocomial infections
- Limit the emergence and transmission of antibiotic-resistant bacteria
- Flag adverse drug events

Meet regulatory compliance

- Access tools that ease compliance with state-mandated reporting of infections
- Mitigate the impact of survey deficiencies and monetary penalties
- Meet mandated performance measures

ABILITY InfectionWATCH helps skilled nursing facilities (SNFs) expand their infection surveillance and antibiotic stewardship capabilities with enhanced access to relevant, actionable data.

ABILITY RISKWATCH[®]

Electronic incident reporting

Reduce liability and identify potential risk

- Capture all essential information via helpful prompts
- Identify root causes
- Prioritize interventions
- Track patterns and trends

Decrease insurance premiums

Increase productivity

- Send reports to the team members you specify automatically
- Track incidents by type

Strengthen risk management

- Improve the entire incident management lifecycle
- Respond quickly to survey issues and concerns (designed for F-323)
- Streamline investigations
- Control reports during discovery

Strengthen your incident management with ABILITY RISKWATCH, which spotlights each occurrence to ensure thorough investigation, proper response and timely review. You can document incidents such as accidents, pressure ulcers, medication errors, falls, and any others you choose.

ABILITY UBWATCH[®]

Manage revenue with confidence

Submit cleaner claims with "triple-check" process

- Create continuity between care required, care provided and care reimbursed
- Locate inconsistent, missing, or inaccurate information in your UB-04 before submission
- Save time by automating the manual, time-consuming UB-04 check

Drive revenue

- Discover areas supported by MDS, but missed on a claim
- Get paid faster with cleaner claims

Minimize audit risk

- Uncover where billing is unsupported by the underlying MDS
- Bring exceptions to your attention

Guide performance improvement

- Evaluate and improve UB-04 claims
- Coordinate clinical MDS and financial UB records

Enhance your billing processes and increase cash flow with ABILITY UBWATCH. By detecting and revealing unintended billing patterns, ABILITY UBWATCH helps you avoid suspended claims, CMS audits, demand for repayments, False Claim Act issues, under/over billing and other missed opportunities that may result in lower revenue.

ABILITY CAREWATCH[®] PBJ

PBJ reporting made easy

Use a single staging platform

- Streamline preparation and validation of your PBJ files from multiple systems prior to transmission to CMS

Accurately check data

- Receive notification of potential errors or inconsistencies in your PBJ files to ensure accurate submissions; you'll also receive Final File Validation Reports through PBJ Transmission Watch

Quickly correct errors

- Manage correction efficiently and make the necessary payroll changes long before the quarterly deadline

Transmit with confidence

- Rest assured that your PBJ data will be accurate, accessible, on time

Analyze staffing trends

- Identify trends and patterns with user-friendly reports that help you improve your operation

It's not easy to interpret all of the new Payroll Based Journal (PBJ) rules and definitions and what they really mean for your organization. Discover how ABILITY CAREWATCH PBJ can help.
